

# UNITECHNICS rat bait box for sewage systems

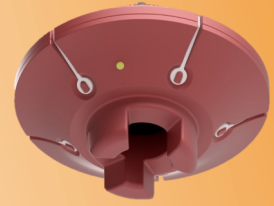

Waterproof usage of rat baits  
even in backwater events.

**suspension:**  
easy installation, simply attach to  
the dirt trap with a rope

**suspension for rat baits:**  
eyelet of stainless steel to attach  
rat baits

**hollow body:**  
reliable floating during backwater  
events in sewer systems

**locking mechanism:**  
easy opening of the bait box to  
change the bait

## areas of application:

- manholes with sizes from Ø 600 mm / 23,6 inches

## features:

- reliable protection of the bait against water
- avoids flushing away of the bait
- no entry required
- damage-free installation (no drilling)
- quick installation under a minute
- efficient installation by one person
- fast change of the bait
- easy transfer to an other shaft

Also equipable  
with sensor  
technology.
